

1. Protect your staff and customers from collision with fork lifts

2. Mark safe operating zones and fixed hazards

Seen sensor monitors danger area

Patented laser technology detects reflective strip

Audible driver and pedestrian alert

Reverse-only detection avoids over-reporting

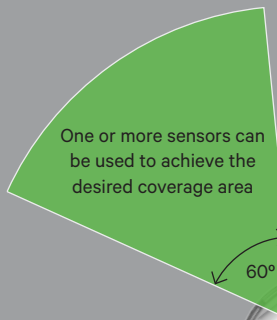

Pre-set detection range up to 8 metres

Life-saving benefits

- Targeted detection of reflective strip
- Simple to implement because everyone on-site already wears high-vis safety gear
- Easy to install
- Precisely shaped detection zone avoids nuisance alerts from non-critical areas
- Minimal training needed
- Reliable detection in all conditions.

One or more sensors can be used to achieve the desired coverage area

Reflective markers can mark fixed hazards or ensure vehicles remain in safe areas

DISCLAIMER. Seen's IRIS60/8 LIDAR sensor is an add-on safety device which provides audible alert information to the operator, but does not provide active safety functions or control the machine.
